PROBLEM 1 :
 Create a Gallery for the Royal Challengers Bangalore Team to display all the players available in the team. Arrange all the images in a grid view using a table with 3 column and 3 rows. Inside each cell create <div> element to hold both the image and the player name with appropriate id attribute. The images are displayed using <img> tag. Create 6 different html page for each player with their image and description as shown in the below screenshot. Provide hyperlinks to both the image and player name to the corresponding player page from your image gallery.

```
<!DOCTYPE html>
<html>
<head>
    <title>RCB Gallery</title>
    <style>
        div {
            text-align: center;
            font-style: italic;
            font-size-adjust: 0.50;
        }
        table {
            margin-left: auto;
```

```html
                margin-right: auto;
            }
            h2 {
                text-align: center;
            }
            body {
                text-align: center;
            }
        </style>
    </head>
    <body>
        <h2 ><B>ROYAL CHALLENGERS BANGALORE</B></h2>
        <table border="1">
            <tr>
                <td>
                    <div id="kohli">
                        <a href="virat.html">
                            <img src="virat.png" alt="Virat Kohli" width="150"
height="150"><br>
                                Virat Kohli
                        </a>
                    </div>
                </td>
                <td>
                    <div id="villiers">
                        <a href="abd.html">
                            <img src="abd.png" alt="Faf du Plessis"
width="150" height="150"><br>
                                AB devilliers
                        </a>
                    </div>
                </td>
                <td>
                    <div id="head">
                        <a href="head.html">
                            <img src="head.png" alt="Glenn Maxwell"
width="150" height="150"><br>
                                Travis Head
                        </a>
                    </div>
```

```
            </td>
        </tr>

        </div>
    </div>
</body>
</html>
```

PROBLEM 2 :

The start of the tenth edition of IPL is already announced and no doubt we can witness cricket going to the whole new level. The IPL Selection Committee members have arranged for the Player Auctions in the near months and are in full swing working towards it. You are given a task to create an application form for the players to apply for the auctions to contest in the IPL, as shown in the given screenshot. Have the content and look and feel of the page as shown in the screenshot, use html table for better formatting.

```html
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title>Player Details</title>
  <style>
    body {

      background-color: white;
    }
    .container {
      width: 500px;
      margin: 40px auto;
      background-color: #add8e6;
    }
    .header {
      background-color: #1e4f7b;
      color: white;
      padding: 10px;
      text-align: center;
      font-size: 24px;

    }
    form {
      padding: 20px;
    }
    label {
      display: block;
      margin-top: 10px;
      font-weight: bold;
    }
    .required::after {
      content: "*";
      color: red;
    }
    input[type="text"],
    input[type="email"],
    input[type="date"],
    select,
    textarea {
```

```css
      width: 100%;
      padding: 6px;
      margin-top: 5px;
      box-sizing: border-box;
    }

    textarea {
      height: 60px;
    }
    .button-group {
      text-align: center;
      padding: 20px;
      background-color: #1e4f7b;
    }
    .button-group input {
      padding: 8px 20px;
      margin: 0 10px;
      font-size: 16px;
      background-color: white;
      border: none;
      border-radius: 4px;

    }
    .button-group input:hover {
      background-color: #ddd;
    }
  </style>
</head>
<body>

<div class="container">
  <div class="header"><b>Player Details</b></div>
  <form>
    <label class="required">Name</label>
    <input type="text" placeholder="Enter your name" required>

    <label class="required">DOB</label>
    <input type="text" placeholder="DD/MM/YYYY" required>

    <label class="required">Age</label>
```

```html
<input type="text" placeholder="Enter your age" required>

<label class="required">Email Id</label>
<input type="email" placeholder="abc12@xyz.com" required>

<label class="required">Country</label>
<select required>
  <option>India</option>
  <option>Australia</option>
  <option>South Africa</option>
  <option>England</option>
</select>

<label class="required">Skill</label>
<input type="checkbox" name="skill" value="Batting">Batting
<input type="checkbox" name="skill" value="Bowling">Bowling

<label>Bat Style</label>
<input type="radio" name="batStyle" value="Right Handed">Right Handed
<input type="radio" name="batStyle" value="Left Handed">Left Handed

<label>Bowl Style</label>
<input type="radio" name="bowlStyle" value="Right Handed">Right Handed
<input type="radio" name="bowlStyle" value="Left Handed">Left Handed

<label class="required">Matches</label>
<input type="text" placeholder="Matches Played" required>

<label class="required">Runs</label>
<input type="text" placeholder="Total runs scored" required>

<label class="required">Wickets</label>
<input type="text" placeholder="Wickets" required>

<label>Achievements</label>
<textarea placeholder="Your Achievements in Cricket"></textarea>

<div class="button-group">
  <input type="submit" value="Submit">
  <input type="reset" value="Reset">
```

```
        </div>
      </form>
</div>

</body>
</html>
```

PROBLEM 3:

Create a favorite list of websites into links and an unordered list as shown in the screen below. When we click on the

favorite link the respective page should open in a new tab.

. Google

. Facebook

. w3schools

Add logos for the sites

Implement the page in below two different ways:

Show the links one line after the other using DIV

PROBLEM 5 :

Create a page student.html showing the reg.no, name, college,stream and department in the table format. Give table header and footer.

Student Details

Reg No	Name	College	Stream	Department
12345	Rahul Sharma	ABC College	Engineering	Computer Science
12346	Priya Singh	ABC College	Engineering	Electrical
End of Student Details				

```html
<!DOCTYPE html>
<html>
<head>
    <title>Student Details</title>
    <style>
        body {

            background-color: #f0f8ff;
            text-align: center;

        }
        h2 {
            margin-bottom: 30px;
        }
        table {
            margin: auto;
            border-collapse: collapse;
            width: 50%;
        }
        thead {
            background-color: #4682b4;
            color: white;
        }
        tfoot {
            background-color: #b0c4de;
            font-weight: bold;
```

```
            }
        th, td {
            border: 1px solid #999;
            padding: 10px;
            text-align: center;
        }

    </style>
</head>
<body>
    <h2>Student Details</h2>
    <table>
        <thead>
            <tr>
                <th>Reg No</th>
                <th>Name</th>
                <th>College</th>
                <th>Stream</th>
                <th>Department</th>
            </tr>
        </thead>
        <tbody>
            <tr>
                <td>12345</td>
                <td>Rahul Sharma</td>
                <td>ABC College</td>
                <td>Engineering</td>
                <td>Computer Science</td>
            </tr>
            <tr>
                <td>12346</td>
                <td>Priya Singh</td>
                <td>ABC College</td>
                <td>Engineering</td>
                <td>Electrical</td>
            </tr>
        </tbody>
        <tfoot>
            <tr>
                <td colspan="5">End of Student Details</td>
```

```html
            </tr>
        </tfoot>
    </table>
</body>
</html>
```
